

FIXED & ADJUSTABLE HEIGHT STAIR UNITS

For ultimate convenience, Staging Concepts manufactures both Fixed and Adjustable Height Stair Units that provide access to any height stage. Both types of stair units include locking mechanisms that attach quickly and firmly to any of Staging Concepts' decks.

The Fixed Height Stair Unit is available in a Formed Stair Unit (for lower fixed height stages) and a Raker Stair Unit (for taller fixed height stages) and can be custom manufactured to fit the height of your stage.

Formed Stair Unit –
for Lower Fixed Height Stages

Raker Stair Unit –
for Taller Fixed Height Stages

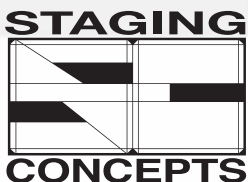

48" Tall Fixed
Height Stage with
Raker Stair Unit

The Adjustable Height Stair Unit can be easily modified to fit stages that are adjustable in height.

FIXED & ADJUSTABLE HEIGHT STAIR UNITS

ADVANTAGES

Safety

- All stair units are equipped with two aluminum handrails for the safety of patrons and performers
- Fixed Height Stair Units manufactured with code-compliant rise and run

Efficiency

- Both Fixed and Adjustable Height Stair Units lock into platform extrusion with no loose parts or special tools
- Removable aluminum handrails allow for easy transport and storage
- For use with all of Staging Concepts' platforms

Variety

- Variety of heights and height ranges available for both Fixed and Adjustable Height Stair Units
- Aluminum handrail for all stair units available in mill aluminum, black powder coat, silver powder coat, black anodized, or clear anodized finish

***Custom sizes available upon request*

TECHNICAL SPECIFICATIONS

FIXED HEIGHT STAIR UNITS

Formed Stair Unit (for lower height stages)

The Formed Step Unit is constructed of lightweight .080" (2mm) aluminum sheet completely enclosed on all sides for superior durability and visual appeal. The tread surface is composed of 1" (25mm) marineteck plywood available with a variety of surfaces. The Formed Step Unit is available in standard and custom sizes for both indoor and outdoor use. Handrails are also available as an accessory to the unit.

Standard Sizes:

- Rise Options: 6 inches (153mm), 7 inches (178mm) or 8 inches (203mm)
- Tread Quantity: 1, 2, 3 or 4
- Width Options: 3 feet (914mm) or 4 feet (1220mm)

Raker Stair Unit (for taller height stages)

The Raker Stair Unit is constructed of structural aluminum tubing and .080" (2mm) formed aluminum risers for superior durability and visual appeal. The tread surface is composed of 1" (25mm) marineteck plywood available with a variety of surfaces. The Raker Stair Unit is available in standard and custom sizes for both indoor and outdoor use. Handrails are also available as an accessory to the unit.
