COMPANY OVERVIEW

Staging Concepts has provided superior product solutions for arenas, stadiums, convention centers, theatres, production companies, and educational and worship organizations since 1990.

As a manufacturer, Staging Concepts takes great pride in fabricating a product line of modular, lightweight, portable platforms for flooring, stages, work surfaces, mezzanines, seating and choral risers, worldwide.

We also have a custom ornamental rail division that engineers, manufactures and installs railings for large venues.

We work closely with designers and architects around the world to ensure that we are at the forefront of technology.

VALUE PROPOSITION

At Staging Concepts, we recognize the importance of meeting exacting government specifications. With an integrated system of design, engineering, and fabrication, Staging Concepts excels in delivering modular, lightweight, custom products that exactly fit your requirements.

Our patented designs and labor saving techniques have established Staging Concepts as the industry leader in both equipment quality and manufacturing efficiency.

The superior features, quality and price of our equipment, combined with our commitment to customer satisfaction, allows Staging Concepts to offer you the best value in the marketplace.

SBA SMALL BUSINESS

Staging Concepts is a quality and experienced source for government contracting officers and purchasing agents to meet statutory obligations requiring supplies and service procurements from small business.

As a small business prime contractor, we have partnered with many other companies to provide you with a complete solution. We also have teaming arrangements with large government prime contractors to offer specific products as part of a large scope government contract.
